Appendix C (CONT.)

5. Based on the format below, please provide a summary of the applicant's administrative and operational policies and procedures to provide individualized and resident-centered care, services, and accommodations, and a sense of peace, safety, and community, and clearly identify how the proposal would advance these areas:

a. Resident's physical environment:

i. Accommodations for privacy vs. congregate and common areas;

The existing facility provides a homelike environment. Residents are provided with privacy in private and shared-occupancy rooms. Common lounge areas provide opportunities for socializing, recreation and interaction.

ii. Choice and autonomy in personal space, fixtures, furniture;

Resident rooms are personalized and provide a real sense of home. Residents and their family members are encouraged to decorate the rooms with personal items, pictures, furniture and other items from home.

iii. Access to and involvement in decentralized services, such as, community kitchen(s), laundry, activities;

Kitchenettes are located throughout the facility. Afternoon snacks include, but are not limited to, cheese and crackers, cookies, fresh fruit, etc. Meals are served in a homelike environment including breakfast, lunch and dinner. There are seasonal menu changes. A full array of activities are offered including a formal, structured activities program as well as self-directed activities including personal time in their rooms watching television, reading books or magazines, listening to music visiting with friends and family, playing games, etc. Laundry services are provided by nursing facility.

iv. Access to outdoors and outdoor activities (e.g., sunrooms, patios, gardens and gardening);

There are lounge areas throughout the facility to provide opportunities for socialization, recreation and interaction. Residents have access to outdoor patio areas with an awning and a courtyard. Weather permitting, activities will allow for musical guests, entertainers, cookouts and other forms of daily entertainment.

b. Resident-centered systems of care:

i. Security systems and care delivery systems to foster autonomy, choice, and negotiated risk;

The facility protects residents by utilizing security systems that prevents high risk residents from exiting the facility without staff supervision. Resident
